

# INTERIOR DESIGN, ASSOCIATE IN APPLIED SCIENCE

## Meramec

The Associate in Applied Science degree in Interior Design prepares students for careers in interior design. The curriculum emphasizes a strong foundation in visual art skills, architecture, and space planning. Utilizing these foundations, students develop creative projects using a systematic approach to the design processes.

The coursework for the interior design program includes solving interior design-related problems by developing free-hand and drafting skills, computer skills, and oral presentation skills. Graduates will be familiar with local and national trade, professional and industry resources. Issues in sustainable and universal design are also explored within the studio environment.

Persons interested in this program should have a strong desire to work with people, enjoy functional problem solving, and appreciate the impact of design in our environment. Previous drawing, design, or drafting courses are also helpful.

Graduates of the program are qualified for entry-level positions in residential and/or commercial interior design and related fields. Careers in interior design may include: residential design, commercial design, health care design, hospitality design, kitchen and bath design, office design, architectural firms, retail stores, wholesale showrooms, and lighting design. Graduates also may be employed as manufacturers' product representatives, freelance designers, or facilities planning assistants.

## At the completion of the program, students are expected to:

1. apply free-hand drawing, hand drafting, computer drafting, rendering, and oral presentation skills to communicate design ideas.
2. develop creative projects using a systematic approach to the design processes.

3. apply the principles and elements of design to design solutions.
4. evaluate interior construction methods, building systems, building codes, fire codes, and life safety codes and their impact on interior planning and design.
5. analyze architecture, interiors, and art within a historical and cultural context.
6. integrate visual art skills in two-dimensional and three-dimensional design to design solutions.
7. compose design solutions that reflect color and light in interior environments.
8. evaluate the accepted ethical standards for the industry and the commitment of a professional interior designer to the built environment.
9. develop design solutions that incorporate behavioral science and human factors on interior design planning.
10. select interior finishes, furniture, and equipment appropriate for the designed interior environment.
11. prepare interior finish, furniture, and fixture specifications.
12. identify sustainable design solutions and apply them to studio coursework.

**Missouri Civics Examination.** Students entering college for the very first time in fall 2019 and who intend to complete an associate's degree must successfully complete a civics examination. Information on who is eligible for a waiver can be found on our website: <https://stlcc.edu/programs-academics/missouri-civics-exam.aspx>.
